MOLDING PROFILE CATALOG

8TH EDITION

✻ Over 1,000 Profiles ✻

RINO'S WOODWORKING SHOP, INC.

Rino's Woodworking Shop is thrilled to present the eighth edition of our quality moldings and exceptional architectural millwork. This edition includes detailed profiles of all our existing moldings, available in both digital and reproducible DWG formats.

Our moldings are meticulously crafted from the highest quality hardwoods available today. We invite you to compare the exceptional quality of our product with any other available on the market.

While this edition showcases our featured profiles, our team is happy to assist you in custom-designing and milling any profile or door to complement your project. We can even create unique custom flairs, such as radial arches and curved moldings, which are often sought after but challenging to find.

You and your customers will be impressed by the clean, consistent profiles, straight, clear lumber, and high-quality trim material. We are confident that you will find no finer product. We encourage you to experience the quality of our work firsthand.

Sincerely,
Dan Ritosa

meticulously
crafted from
the highest
quality
hardwoods

*We make quality, custom-designed
cabinets for those who appreciate
the finer things in life.*

CABINET DOORS

We can match existing door profiles for your renovation projects.

CABINET DOORS

We can match existing door profiles for your renovation projects.

Rino's Woodworking Shop, Inc. promises that regardless of the size of your project, whether it's two cabinets or 50,000 linear feet of custom hardwood molding, you'll receive the same exceptional level of pride, flexibility, craftsmanship, and attention to detail. There are no limits to what we can build; if you can dream it, we can make it.

Our wood moldings, S4S, and plywoods are among the finest available. We manufacture crowns, casings, baseboards, tongue & groove, bar rails, panel molds, and many other profiles. For added enhancements to your project, we offer arches, curved molding, bases, jambs, and custom-cut profiles.

In addition to moldings, we supply hardwood-veneered plywood and S4S or 1 x material. Stocked hardwood and plywood species include poplar, red oak, white maple, cherry, mahogany, and pine. Through our exclusive supply chain, we can obtain specialty materials and exotic hardwoods in just days.

We also offer additional millwork products and services such as countertops (plastic laminate, Corian, and wood), wood turnings, finishing (clear lacquer, staining, and painting), and installation.

We cordially invite you to contact us or visit us to discuss your design needs. Builders worldwide have turned to Rino's Woodworking Shop, Inc. to provide their customers with high-quality moldings and cabinetry for their construction projects.

Customize Your Architectural Moldings

We welcome the opportunity to custom design and mill any profile or door that would perfectly complement your project. For an additional fee, we can also create custom flairs, such as radial arches and curved moldings, which are often requested but difficult to source.

Visit our website to download the catalog in PDF or DWG format.

Our specialties include:

- Custom Cabinets
- Hardwood Moldings
- S4S Lumber
- Chair Rails
- Crown Rails
- Baseboards
- Bar Rails
- Handrails
- Countertops
- Turnings
- Finishing & Installation
